Brian Godoy

Full stack web developer

Profile

As a Full Stack web developer, I specialize in using the MERN stack with a particular focus on the Front-End.

My skills range from designing attractive, simple and functional user interfaces to addressing security, data management, application logic, scalability and performance issues.

I am totally willing to adopt new technologies to improve my performance.
I would like the chance to delve into other technologies, such as TypeScript, MySQL, Java with SpringBoot, and AWS.

Experience

Full stack web developer || rocFar

February 2024 — Present

We create digital solutions for people's needs, whether it is a digital store, a local newspaper, or any web application.
Responsibilities:

•Define the project structure (Frontend and Backend). •Define the technologies that allow us to advance

quickly without affecting the delivery date and are optimal for the type of application.

•Complete assigned tasks by meeting stipulated dates

Technology package:

React 18.2.0 · CSS3 · React-Router-Dom 6.22.1 · Astro 4.5.9 ·

Sonner 1.4.3 · TailwindCSS 3.4.1

Tools:

Design: Figma, Code: Visual Studio Code, Control
versions: Git, Task board: Trello.

Personal projects

Social Network, Full Stack Developer

November 2023 — March 2024

A social network composed of a user search engine, the ability to follow other users, a panel to make publications, a feed to see the publications of users that I follow, a form to register users, edit user and user login.

Hobbies

In my free time I learn about new technologies, updates to the languages I use, and I exercise to stay healthy.

Responsibilities:

- Lead the design and comprehensive development of a social network, covering from the front-end to the back-end.

- Build and manage back-end infrastructure, including user search logic, tracking, post management and news feed.

- Ensure back-end efficiency and security, optimizing database queries, implementing security measures and managing data storage.

Technology package:
  React 18.0.2 · React-Router-Dom 6.21.3 · Redux 8.0 · Node 16.20.2 · Express 4.18.2 · Mongoose 8.0.3

Tools:
- Design: Figma.
- Code: Visual Studio Code.

BlogAnime || Front-End Web Developer
August 2023 — November 2023

BlogAnime is a blog, for a person who is dedicated to the influencer/youtuber who shares information about the world of anime/games and wants to extend it to the entire internet through a website.

Responsibilities:

- Design and development of the blog, covering from the front-end to the back-end.

- Build and manage the back-end infrastructure, including an article search engine, filter by genre, article creator, and article editor.

Technology package:
  React 18.0.2 · React-Router-Dom 6.21.3 · Node 16.20.2 · Express 4.18.2 · Mongoose 8.0.3

Tools:
Design: Figma, Code: Visual Studio Code.
